

About the corporate presentation:

- This is the standard short version of the SARIA Corporate Presentation. If you wish to include further slides, you are welcome to create them yourself according to your needs, take them from the additional slides kit (if available), or send a message to group-communications@saria.com specifying the slide(s) you need so that they can be added to the portfolio.
- The order of the slides in the standard presentation is a suggestion, not a rule – you are welcome to switch them according to the storyline you prefer.
- However, the information on the slides should not be altered. Changing the pictures is no problem.
- The presentation includes a variety of options for the cover slide. Please choose the one you like best or that serves your purpose best and delete the other ones.

About the presentation kit:

- The presentation kit will be continuously expanded; it includes additional slides that contain further information about the Group and can be added to the standard presentation, as well as alternative options for some of the slides in the standard short version.

YOU CAN

- Change the order of the slides
- Exchange the pictures for different ones
- Add or delete slides according to your needs
- Translate the presentation into other languages as long as the information remains unchanged

YOU CAN'T

- Change the information/facts in the presentation
- Make changes to the basic design specified by the slide master (e.g., use a different font)
