Pharmaceutical ingredients

Successful development: sustainable growth for many years

- **Continuous expansion** of our portfolio through new applications, technologies, and solutions
- **Increased specialization and upscaling** in the products and services we offer
- **Internationalization** in relevant growth markets with a global perspective
- **Clear customer focus and sustainability** as the basis for future growth

Our Vision

To be the preferred partner for sustainable solutions, setting best-in-class standards within our industry.

We meet the needs of our partners through strong customer orientation, continuous innovation, and by having the best people.

Our Mission

To create value for our partners and the environment by delivering reliable services and transforming organic resources into high-quality ingredients for agriculture, energy, pet food, animal feed, food and pharma.

Local entrepreneurial spirit, a hands-on mentality and passion for our business along the entire value chain form the basis of our worldwide activities.

Together towards a sustainable world and healthier living

3 operational divisions: the organization at a glance

Organics2Power

Sinova

Food & Pharma

SECANIM

ecoMotion

BIOCEVAL

 DEVRO

ReFood
pure bioenergy

SARVAL

VH
VAN
HESSEN

b Bioiberica

SecAnim

Fallen livestock from agriculture, risk material from the meat industry

Animal meals as alternative fuel and organic fertilizers, fats as feedstock for ecoMotion biofuel

ReFood

Food waste from supermarkets, restaurants, and the food industry

Renewable energy, feedstock for ecoMotion biofuel, organic fertilizer

ecoMotion

Animal fats and used cooking oils from SecAnim and ReFood

Sustainable 2nd generation biofuel

SARVAL

Products from the meat industry that are suitable for human consumption but for which there is little demand in modern Western diets

Bioceval

Products and species from the fish industry which are not used for human consumption

Proteins, fats and oils as nutrient-rich, sustainable ingredients for the pet food, feed, aqua feed and oleochemical industries

Van Hessen

Gut package and meat products from the meat industry

Natural casings, meat products, pharmaceutical raw materials supplied to Bioiberica

Devro

Hide splits from bovine and porcine origin

Collagen-based casings, gels and films for the food industry

Bioiberica

Mucosa, cartilage, other products of animal origin

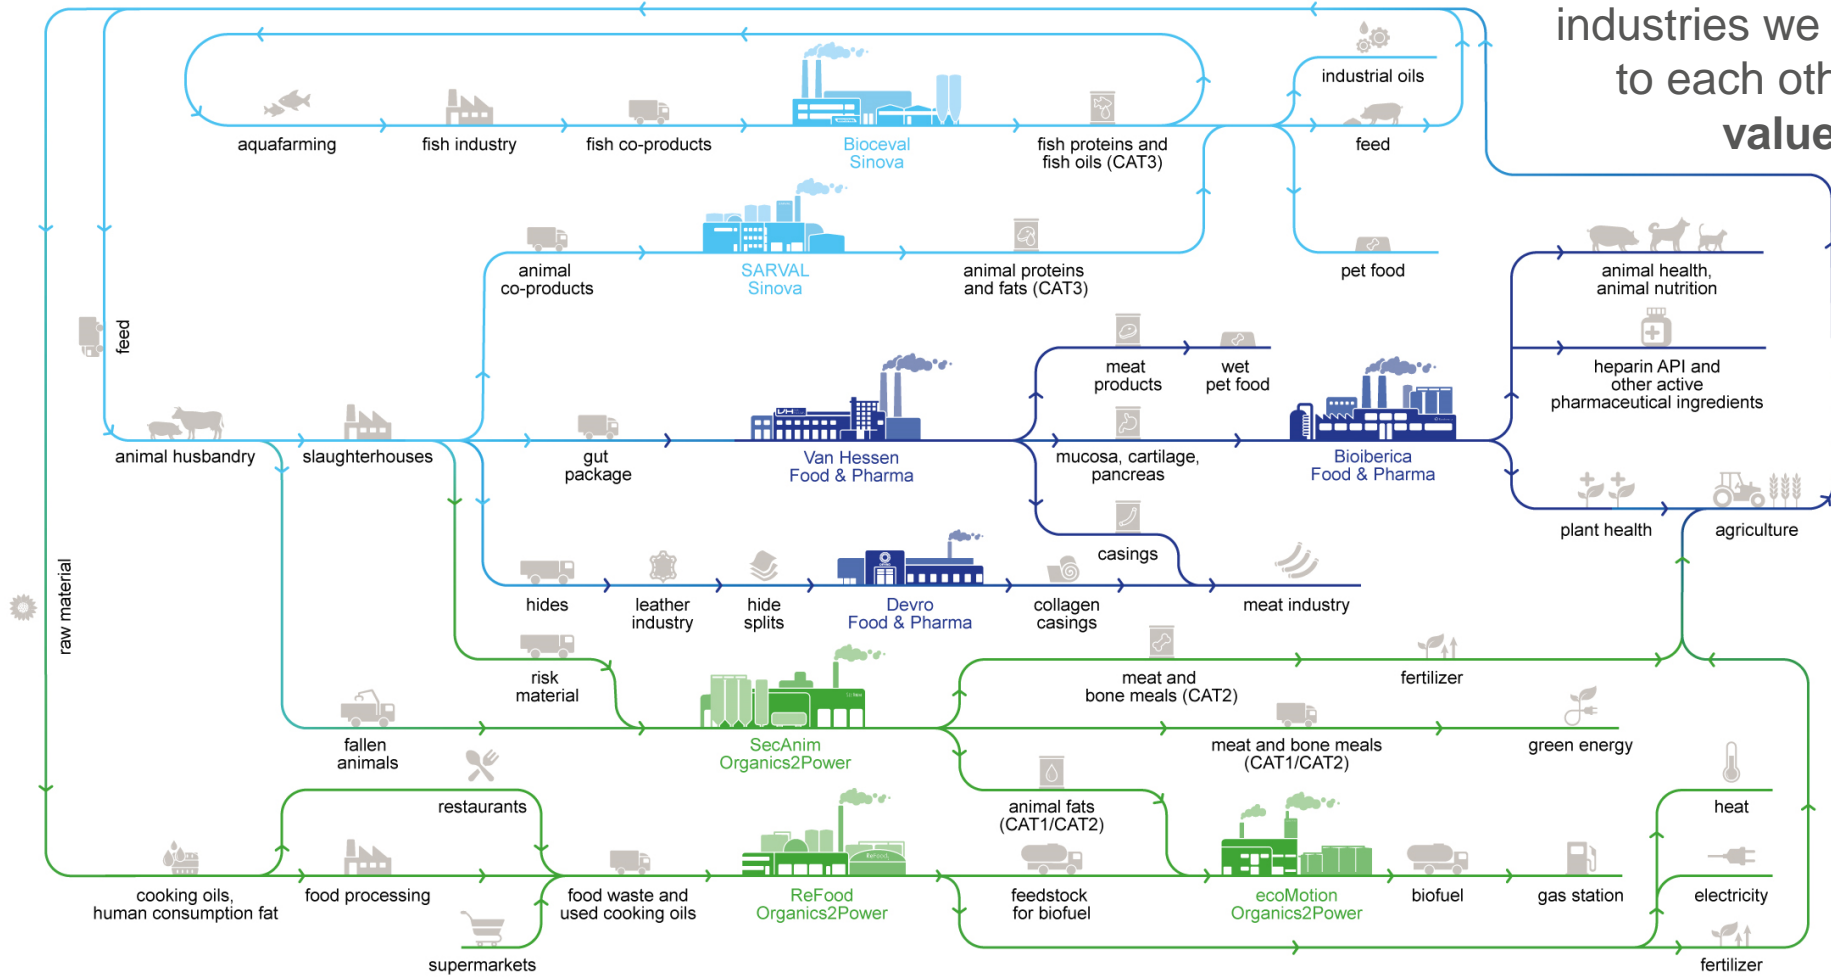

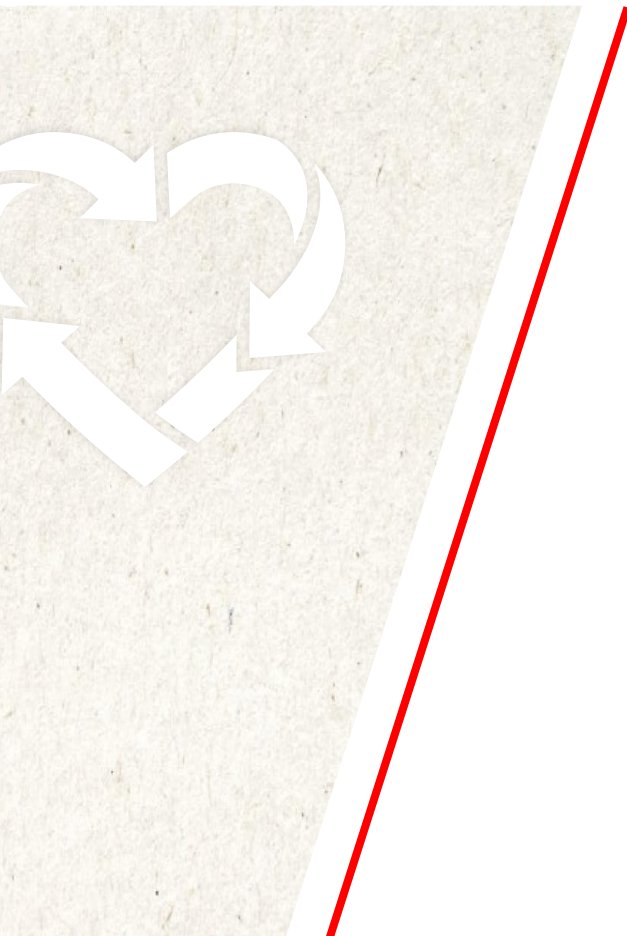

Heparin API and other active pharmaceutical ingredients, supplements for animal nutrition, products for plant health

Closing the loop: SARIA's circular business model

Our **business activities** and the industries we serve are **all connected** to each other, allowing us to **create value** for our partners and the environment.

We **combat climate change** through:

- Producing **green energy** for industrial and municipal use
- Providing **sustainable raw materials** to various industries
- **Decarbonizing** our partners' value chain
- Enabling **CO₂ emission savings** of up to 90%
- Responsible and efficient **water and energy management**

We assume **social and economic responsibility**:

- As a worldwide **employer of 10,500 people** from all backgrounds
- By continuously **developing our people**
- Through **social engagement** in our **local communities**
- With high **health and safety** standards and **responsible business practices**
- Through **high quality** standards in our products and services
